

ZHONGWEI ZHANG (Zachary)

Auckland, New Zealand | zahz885@aucklanduni.ac.nz | [GitHub](#) | [LinkedIn](#)

PERSONAL STATEMENT

Master of Information Technology student building and deploying full-stack applications through New Zealand-based team projects. Previous system and product development roles at Tencent and Shanxi Xinhui Technology strengthened cross-functional collaboration, professional communication and structured problem-solving. Interested in software engineering and full-stack web development.

KEY COMPETENCIES

- Developed and deployed full-stack applications using React, Next.js, TypeScript, Svelte, Node.js, PostgreSQL and SQLite.
- Designed responsive, interactive interfaces and reusable state-driven components for web applications and browser games.
- Implemented REST APIs, authentication, password hashing, database persistence, search/filtering and image-upload workflows.
- Diagnosed UI, state, audio, API and persistence issues through structured debugging and automated testing.
- Collaborated in New Zealand-based four-to-six-person teams using feature branches, pull requests, code review and iterative integration.

EDUCATION

Master of Information Technology, University of Auckland Jul 2025 - Present

- Achieved A+ grades in COMPSCI 718 and COMPSCI 719; completed COMPSCI 732.

Bachelor of Mechanical Engineering, Xi'an Jiaotong University Sep 2017 - Jul 2021

SELECTED NEW ZEALAND ICT PROJECTS

Last Answer - Browser-Based Fantasy Quiz RPG | Team 8-Bit 2026

Next.js / React / TypeScript / Tailwind CSS / Zustand / PostgreSQL / Vitest / Vercel

- Designed a component-based quiz-battle interface with combat stages, HUDs, timers, answer grids, logs, effects and outcome screens.
- Engineered deterministic turn-based combat, support tools, question randomisation, rewards and post-battle state transitions.
- Integrated scene-aware audio and responsive visual feedback, then tested, debugged and deployed the application with the team.

DoraBlog - Full-Stack Blogging Platform | Four-Person Team 2025 - 2026

SvelteKit / Node.js / Express / SQLite / Turso / Vercel Blob / Java / REST APIs

- Developed authentication, real-time username checks, password feedback, profile management, search/sorting and image uploads.
- Integrated bcrypt password hashing, HttpOnly JWT sessions, database-backed content and a Java Swing administration client.
- Deployed the SvelteKit and Express services on Vercel, migrating production data and images to Turso/libSQL and Vercel Blob.

Currency Exchange Web Application | University Team Project 2026

Svelte / JavaScript / Chart.js / localStorage / Vercel

- Built exchange-rate visualisations and configurable threshold alerts with browser persistence, then tested and integrated the features.

EARLIER INDUSTRY EXPERIENCE

System Engineer, Tencent Oct 2024 - Apr 2025

- Supported system-development work and cross-functional coordination in a full-time engineering environment.

Product Development Engineer, Shanxi Xinhui Technology Co., Ltd. Sep 2021 - Jul 2024

- Contributed to product and software development while collaborating with colleagues on engineering delivery.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, HTML, CSS, SQL, Java

Frameworks & Tools: Next.js, React, Node.js, Express, SvelteKit, Tailwind CSS, Zustand, Chart.js, Git, GitHub, Vitest, Vercel

Databases & Areas: PostgreSQL, SQLite, Turso/libSQL; REST APIs, authentication, responsive UI, state management, testing, system development, product development
